1 introdction

in this project i have anlyis the WeRateDogs dataset to answer some questions

1.1 Questions

1- what is the common types of dogs? 2- what is the common names of dogs?

2 Visualization

in fact the dataset has None in most of the type, because i cannot remove the rows i have construct this graph only for the real dogs type as we can see we have 4 type: 1- puppo 2- pupper 3- doggo 4- floof

the pupper is the most common type of dogs in the dataset.

from this bar chart we can see thet, the Charile is the most common name in the dataset.
